SCAN SPRAY

**Lossless matting
for all materials and surfaces**

- Extremely detailed ($<1\ \mu\text{m}$)
- For surfaces that are difficult to capture, whether smooth, polished, reflective, rough, wet, oily, greasy or waxy
- Ideal for polished metal surfaces, plastics, glass and ceramics
- Captures the smallest edges and geometric details
- Free from TiO_2

The finest Scanspray

Premium Quality
Made in Germany

SCAN SPRAY

Extraoral anti-reflection powder
Free of titanium oxide

The finest Scanspray ever

elaboro®
SCANSPRAY ultrafine

Conventional Scanspray

Even the smallest features and fits are reliably matted, resulting in optimum 3D measurement results even with older scanners.

Works always and everywhere

- Implants & model casting
- Glasses, metals and polished surfaces
- Alginate and silicone impressions
- Plaster models & wax models
- Ceramic restorations & plastics
- Oily, greasy and wet surfaces
